

## DMG DELTA

### ENVIRONMENTAL POLICY

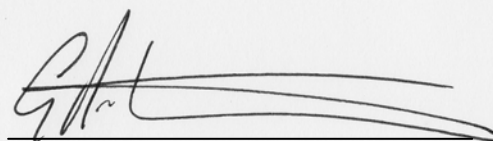

DMG Delta recognise that the responsibility of ensuring a safe, healthy and sustainable environment is important to its business, and the company is therefore committed to achieving environmental best practice throughout its business activities, wherever this is practicable. We recognise that in the nature of our business, we inevitably impact upon the environment in a number of ways and we are committed to minimising the potential harmful effects wherever and whenever possible. Environmental management is a corporate priority and is fully integrated in our business.

In order to minimise the impact of its operations on the environment, DMG Delta will, wherever possible:

- Comply with all environmental regulations, legislation and approved codes of practice related to the processes and activities of the company, exceeding requirements wherever possible.
- Assess the environmental effects of the company's activities and minimise all forms of pollution.
- Reduce the consumption of water and energy at the company's premises, as well as promoting energy saving practices amongst all employees, including both office and field staff in discussions relating to environmental matters.
- Promote energy saving practices amongst our clients, through the marketing of products which make efficient use of resources and which can be re-used, recycled or disposed of safely.
- Dispose of hazardous waste as per COSHH regulations, and all other applicable legislation currently in force.
- Reduce the amount of waste produced, as well as constantly searching for available recycling opportunities
- Involve employees in our environmental programme and provide necessary training to assist in a general understanding of environmental concerns
- Work with key suppliers, contractors and clients to encourage them in the development of environmental best practice

This environmental policy will be implemented by means of an **Environmental Management Plan**, which describes the organisation and arrangements in place to attain the aim of this policy.

DMG Delta will monitor, control and set targets where possible to promote environmental protection in all the company's activities, with a view to continual improvement in this area.
